

## How to create a new Microsoft account

1. Go to **account.microsoft.com**, select Sign in, and then choose **Create one!**
2. If you'd rather **create a new** email address, choose Get a **new** email address, choose Next, and then follow the instructions.

### Step 1

### Step 2

A screenshot of the Microsoft 'Create an account' form. The form has a white background with a light gray border. At the top is the Microsoft logo. Below it is the heading 'Create an account'. There is a text input field containing 'kyz@example.com'. Below the input field are two links: 'Use a phone number instead' and 'Get a new email address'. At the bottom right of the form is a blue button labeled 'following'.

### Step3

← carionjh007@gmail.com

## create a password

Enter the password you want to use with your account.

create a password

☐ Show password

following

### Step4

← carionjh007@gmail.com

## Confirm email address

Enter the code we sent to **carionjh007@gmail.com** .  
If you haven't received the email, check your spam folder or [try again](#) .

Enter the security code

☐ I would like information, advice, and offers regarding Microsoft products and services.

Choosing **Next** means that you accept the [Microsoft Services Agreement](#) and the [Privacy and Cookie Statement](#).

All the information requested is mandatory and will be used by Microsoft to create your account and allow you to connect to Microsoft products and devices. The data provided will be associated with your account in order to personalize and synchronize your experience on different devices. Subject to your choice relating to advertising, Microsoft will also use this data to personalize the advertising addressed to you.

### Step5

## How to install power BI desktop

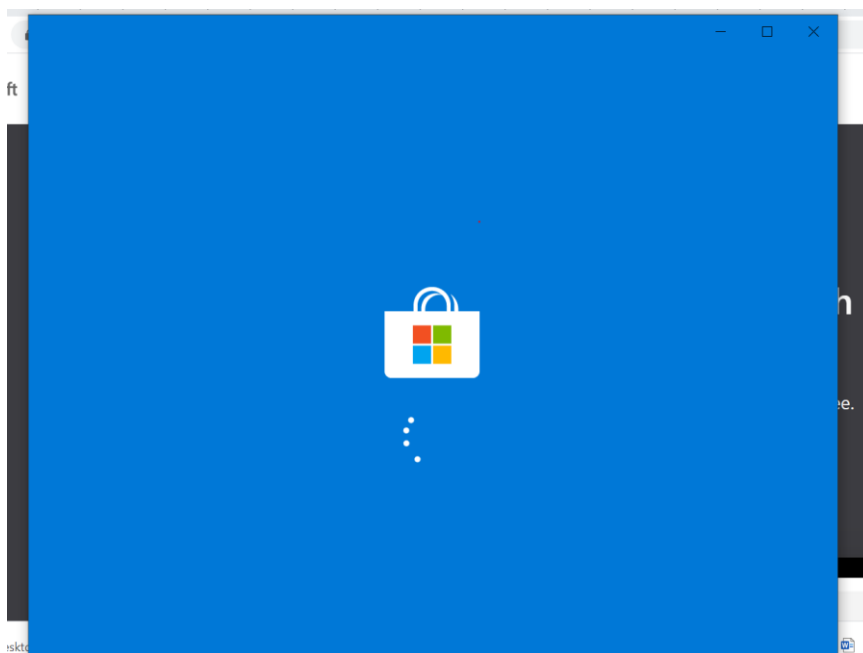

### Step 1:

### Step 2: choose to open Microsoft store for example

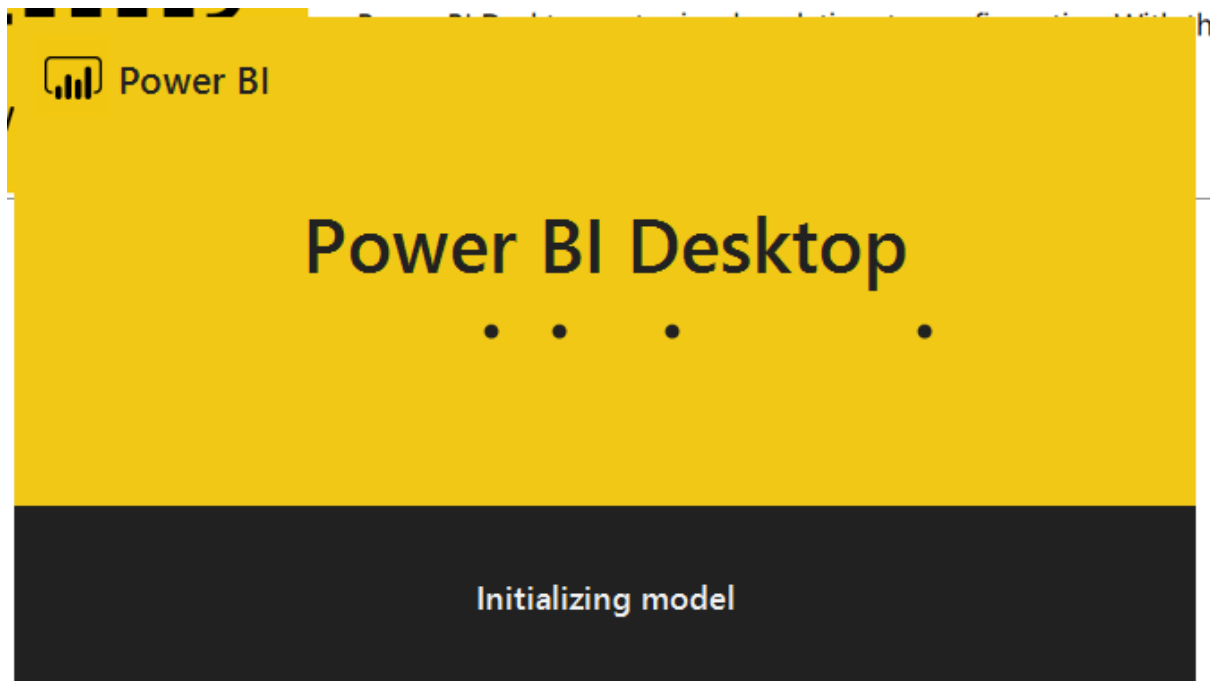

### Step: Store

Step: Click on download & when it's done you have this

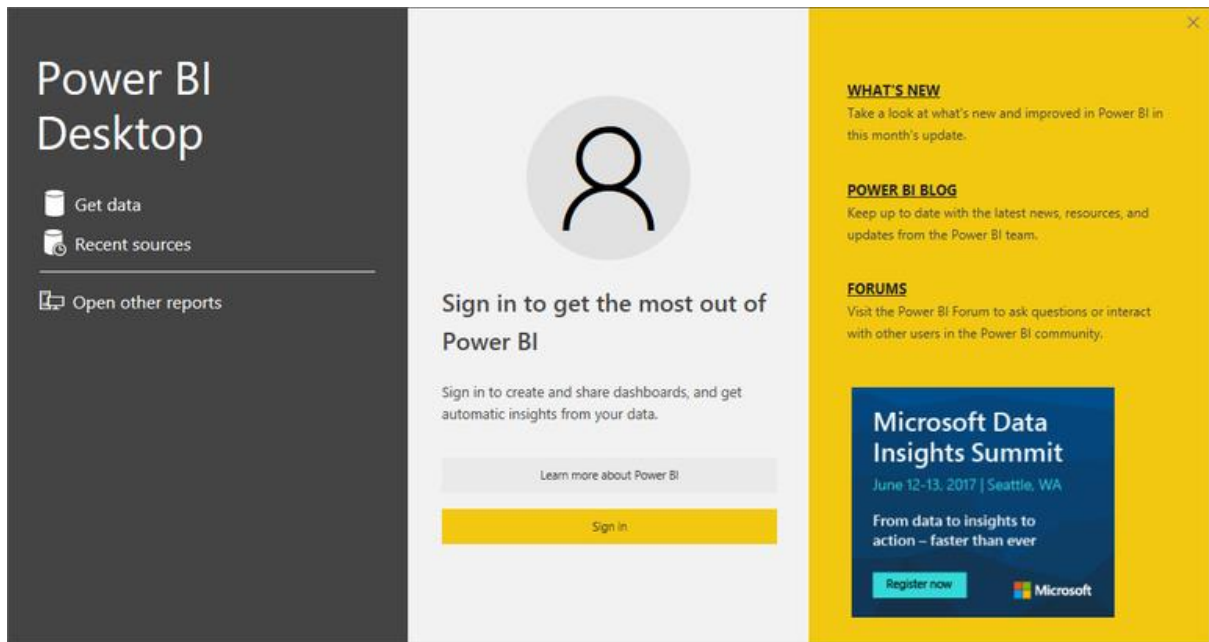

**Step:** Launching your app (at this stage don't launch but open directly the dashboard file I provided by double clicking)

Step: Start the app sign in

Note that when you start the Power BI Desktop application the first time, it will go through an initialization process that takes a little longer than you might expect. When it finished you should click on the try free button

After logging in, you will be presented a Power BI workspace very similar to the online version. From here you can import data and create reports and dashboards, then share them with your colleagues, team members, department heads, or the entire enterprise, if you wish.

Step: Done!
